

I wish to request that the Federal Government not interfere with the Indiana Telephone Privacy Law. I have been on the list since it was implemented and now find that I receive very few unwanted calls. Even though I have an unlisted number, many calls are now computer generated and I still received those calls. I live with my elderly mother who is hard of hearing and becomes easily confused. Many times those unwanted calls caused her to become uneasy or scared because she could not understand. Then I was interrupted at work in order to calm her. This has not happened since the law became effective. As a result, I find my home time not interrupted with undesired and unwanted calls, and my work time is also not interrupted--life is calmer and more pleasant when you can eat meals that are still hot, you can complete a TV show or a movie, your line is not tied up by unwanted calls blocking desired calls, you aren't "pressured" into buying things you don't want or aren't interested in, and, best of all, you don't hear constant ringing of the phone!
